

The Whole Tooth

Produced for the Patients of Dr. Stephen Davidson

Winter 2009/2010

fromthedentist

Welcome!

Our new newsletter

Welcome to the very first issue of *The Whole Tooth*, a newsletter designed to keep you informed of new ideas and concepts in the field of dentistry. Over the next few issues we will bring you information on areas such as cosmetics, whitening, oral cancer screening, and many other topics where dentistry has made terrific advances over the last few years. We also hope to bring you information that is particular to our office, of which you are the most important part.

This newsletter relies on your input to be successful, so please mention any topics that you would like to see included in a future issue. If you happen to receive two issues, please share one with a friend who you feel might benefit from the services and care that we provide.

Yours in good dental health,

Dr. Steve Davidson

A time to celebrate
what is yet to come...

Thank you for all your referrals. We appreciate them!

Not For Women Only

6 perio facts

- 1 Around age forty both men's and women's bone-protecting hormones decline which can lead to thinning bones or osteoporosis.
- 2 Osteoporosis has been linked to periodontal disease. As the disease progresses, it can lead to tooth loss, jaw problems, bite problems, and diminished ability to create functional restorations.
- 3 Periodontal (gum) disease appears without symptoms, is often considered the sixth complication of diabetes, and has been linked to cardiovascular diseases, cancers, kidney and lung diseases, osteoporosis, and complications of pregnancy.
- 4 Regardless of age or gender, minerals like calcium and phosphorus, and vitamins A, C, and D are necessary for strong teeth and bones.
- 5 Tobacco and alcohol should be avoided, especially in combination.
- 6 Brushing, flossing, and regular checkups are the building blocks behind a healthy mouth and an appealing smile regardless of age or gender.

Healthy You

Healthy environment

The journey of a thousand miles may start with a single step, but 10,000 steps a day can get you on the road to personal fitness. Millions have stepped up to the five-mile challenge and invested in a convenient easy-to-use and highly motivational techno wonder. Clipped to your belt, your pedometer can measure your steps and challenge you to fitness.

Did you know...?

- Most of us only walk about half the recommended distance per day.
- If present patterns continue, by 2010, a quarter of us won't fit a standard office chair.
- You can safely increase your steps by as little as 10% every week or two.
- You can divide the day into three parts and try to include a walk in each part.

Commit to your pedometer and wear out your shoe leather - not the environment!

Wish No Longer

Your dream smile is waiting for you!

Your teeth's enamel allows light to pass through in much the way that glass does. That's why healthy teeth enamel has such a beautiful luster. The glass-like nature of fine translucent porcelain veneers allows them to create this same kind of luminous appearance. Yet in spite of this fineness, bacteria-resistant veneers can add strength to your enamel, brighten your smile by several shades, and mask flaws.

Cosmetic veneers could give you your dream smile if...

You're unhappy with the shade or uneven color or mottled appearance of your natural enamel which detracts from an otherwise pleasant smile.

- *Mask the cumulative staining effect from coffee, tea, colas, and tobacco products, or chemical compounds like fluoride and the antibiotic tetracycline as well as root canal treatment.*

You are unhappy with the shape and proportion of your teeth.

- *Enhance the appearance of your smile by acquiring more balanced proportions, disguising gaps and spaces, and covering chipped, broken, or malformed teeth.*

You are unhappy with the misaligned appearance of your teeth but don't want to wear braces.

- *Idealize the appearance of slightly rotated, tipped, or misaligned teeth by using veneers as instant orthodontics.*

Whatever you feel, we can work together to determine the best veneer makeover strategy for your hand-crafted custom-fitted porcelain veneers. Be sure to bring your wish list to your initial consultation appointment!

IDEALIZE

A Little Or A Lot

You can decide how far to go

What would it take to keep you smiling and happy? Happiness is a serious issue. Don't laugh – there's an actual institute dedicated to researching the topic. One thing is for certain: relationships, work, and social confidence can be affected by your smile.

Whether you need just a little bit of help or a complete smile makeover, here are some options that we can use alone, combined with each other, or in combination with other cosmetic options.

Crown

A crown can cover and protect a tooth that has become fragile through decay or large or recurrent fillings. Natural-looking porcelain is usually used for front teeth, and porcelain fused to metal can be used for either front or back.

Crown & Bridge

Just as a crown refers to the restoration of a single tooth, a crown plus bridge refers to one or more artificial teeth used to span a gap.

Three-Quarter Crown

Sometimes called an onlay, this can be used when part of the natural tooth enamel is still healthy. Only three-quarters of the tooth needs to be restored.

Dental Implants

A dental implant is a permanently placed artificial tooth which is anchored in your jawbone just like a natural tooth. Implants look and feel like your own teeth.

Modern restorations like implants, crowns, and bridges are durable, stain- and bacteria-resistant, secure, and long-lasting. Most importantly, they look completely natural – only better than before. Now there's a happy thought!

TEMPT YOUR TASTEBUDS

TRY WHITE TEA

The Chinese have been enjoying this pale beverage with its sweet silky flavor since the Ming Dynasty. White tea has become the infusion of choice among tea – and health – aficionados because it can help your body's immune system to fight off viruses and dangerous infection-causing bacteria. Fluoride-rich white tea can also help to prevent the growth of dental plaque – the root cause of tooth decay and gum disease – without staining.

Steamed instead of processed, its silvery leaves remain so close to their natural state that white tea also retains more of the powerful anti-oxidant that fights and kills cancer-causing cells than any other type of tea.

You can enjoy this refreshing non-staining brew in a cup or in anti-viral and anti-bacterial toothpastes enhanced by the addition of white tea extract.

A Bright Clear Future

Technologies that may be right for you

Invisalign® Keeps Your Secret

We're one of the first practices to offer Invisalign®, one of the most advanced components of adult cosmetics. It's a proven method for straightening teeth using a series of custom-made, nearly undetectable aligners. Each aligner is precisely calibrated and manufactured to custom-fit over your teeth and gently move them through every stage of your treatment. No metal wires! No food restrictions!

Adults account for nearly 25% of all orthodontic patients! The most common problems? Crowding, spaces, and protruding teeth. After consultation, we take an impression of your teeth and submit it to Invisalign. Using the latest 3-D computer technology, our instructions are translated into a series of medical-grade plastic aligners. You can even view your own virtual treatment plan when you start, so you can see how great your straight teeth will look!

If you think you're a candidate for Invisalign, call us for a consultation. We want you to feel happy and confident about your smile!

Cerec 3D™ Smiles Natural, strong, and fast!

We're very proud to offer Cerec 3D™, the world's most advanced dental restoration system. With it we can manufacture lifelike porcelain crowns, veneers, inlays, and fillings right here in our office *during only one visit...* instead of 2-3 appointments.

Cerec 3D technology allows us to take a three-dimensional picture of the damaged tooth. Our ability to design your restoration is optimized by the realistic 3D CAD program images. We then transfer it to the CAM program which accurately and precisely mills the restoration while we monitor its process. Our final step? Bonding your finished restoration in place.

The strong ceramic material matches your tooth color, looks like natural enamel, and is biocompatible.

Cerec 3D could transform your smile! Please call for a consultation.

Perfect Timing: Ensuring your health

We hope that all our patients and their families have a fun and frivolity-filled holiday season – and that everyone greets the New Year safe and sound!

And we'd also like to give you a little advice: the new year marks the beginning of many of our patients' dental insurance year, when your fund is replenished and full, which means it's the perfect time to make certain you're completely up to date with all your oral health needs. We certainly hope you haven't postponed any regular checkups, but if you have, please contact us today so we can perform your regular examination and teeth cleaning. This would also be an ideal time to consider an in-house whitening or cosmetic procedure to greet spring and summer in style!

We look forward to seeing your smile!

Valued and Appreciated!

Our dental family has grown through the years by your generous referrals. We rely on our valued patients to spread the word and to encourage folks to give us a try. As a matter-of-fact, I'd consider it a personal favor if you would share this valuable information with a few people you care about. It entitles them to the opportunity to get acquainted with my office for only \$25. Plus, **we'll credit your account in the amount of \$100** for each **new adult** patient who takes you up on the offer. It's our way of saying thanks for your continued patronage and a way to make your dental health even more affordable.

From our entire office, best wishes for healthy and prosperous 2010! Please know that our blessings include you and that you are remembered fondly this holiday season.
